

Cynarin

IT Pharma
INNOVATING TECHNOLOGY PHARMA

- Cosmetic solution with a diuretic effect

Description

Cynarin contains artichoke extract, noted for its lipolytic properties. Cynarin acts on the kidney and liver, favouring increased fluid elimination through urine. Extensive investigations have defined insufficient lymphatic drainage as one of the causes of cellulite, as it reduces the removable fluid flow rate. The result is pitted skin caused by changes in the blood circulation, poor lymphatic drainage, fat and connective tissue.

Artichoke extract promotes the synthesis of the NAD-NADHZ AND NADP-NADPHZ coenzymes, which help to control lipolysis. Numerous publications - Vademecum of plant prescriptions (Masson 1998) - have supported the diuretic properties of Cynara, which is extremely useful in the treatment of oedemas, one of the characteristics of cellulite, as well as in overweight cases accompanied by water retention.

PACKAGING

 10, 5 ML STERILE VIALS

COMPOSITION

Aqua / Cynara
Scolymus Extract /
Sodium Chloride.

APPLICATION

Cynarin is specifically intended for the treatment of cellulite, as a detoxifier for the skin and the body in general. Basically, it can either be applied topically to the skin or else through electromedical systems for the transdermal delivery of substances. Depending on the selected device and whether or not Cynarin is mixed with another product, the use of one vial per session is recommended, applied by massaging the area to be treated in circular, upward movements. The recommended procedure is a standard treatment, always depending on the specific case and under the supervision of the appropriate professional, which could be two high-impact sessions the first and second weeks, 1 session the third week and the final session in the fourth week.

HOW IS IT USED?

Electroporation treatment

Micro-needling skin Dermopointer

Turtlepin

Active ingredients

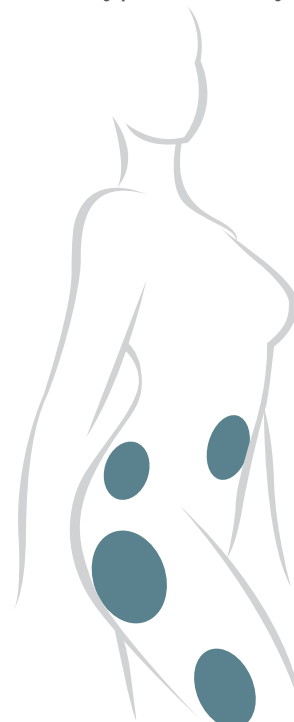

CYNARIN 5%: Cynarin stimulates the production of bile in the liver and subsequently facilitates its release into the gallbladder, favouring the digestion of fats.

VITAMINA A: Vitamin A helps the formation and maintenance of teeth, soft tissues and bone tissues, mucous membranes and healthy skin.

PHYTOSTEROLS: Plant sterols block the absorption of cholesterol in the intestine, lowering the plasma levels of total cholesterol and LDL cholesterol (the so-called bad cholesterol).

RECOMMENDED TREATMENTS

- It can be applied to any part of the body

CELLULITE

 4 ml Cynarin
 5 ml L-Carnitina

Electroporation

LOCALISED FAT

 4 ml Cynarin
 5 ml Phosphatidylcholine

Electroporation/
Dermopointer

DRAINAGE

 4 ml Cynarin
 2 ml Cumarin
 2 ml Cafein

Dermopointer
